

True or False:

Vision problems and poor visual skills including tracking problems can cause poor results on standardized tests...

Answer: True

Free educational workshop for parents, educators and other professionals

Come learn about all the visual skills that are critical to success on tests, performance in the classroom and during homework:

- Visual Tracking Skills
- Visual Focusing Skills
- Eye Teaming (Binocular Vision) Skills
- Visual-Motor Integration Skills
- Visual Information Processing Skills
- Visualization Skills

Seeing the letters on the eye chart, “20/20,” is just one of 17 visual skills that are vital to academic success.

If you know a child that’s not performing to his or her potential or struggling with test performance, find out if an undetected visual problem is at the root of their problem!

Tuesday, November 1st 5:45–7:00 p.m.
