

## A Vision Therapy Success Story

Before starting VT I always felt a little behind from everyone else. I felt that even when I was trying my very hardest there was always something missing. I remember every teacher ~~was~~ would always say, "Jason is a bright kid, but he isn't working up to his potential." So my family and I tried everything to sort this mess out. We got me tested for ADD, we tried a private tutor, but none of them really gave us the answer we needed. And finally my mom heard about VT. When we first started VT I felt nervous and skeptical about everything. But after going through it all I saw the results that I wanted. I was finally starting to get A's and B's and school is now starting to become easier. I would like to thank everyone who has helped me throughout this journey.
